- Currently learning AutoCAD, SketchUp, Lumion, Photoshop, GIS, and InDesign
- Problem-Solving, Collaboration and Interpersonal Skills
- Creative-Minded and Artistic

LANGUAGES

- English ●●●●●
- French ●●●●●

ABOUT ME

As a dynamic, hardworking individual, I thrive in **creative and collaborative** environments. Switching my major from Astrophysics to **Environmental Design**, I am now looking for opportunities in the fields of Design, Planning, and Architecture to showcase my passions and talents. Through courses from my previous and current majors, I have developed a **multi-faceted background of knowledge and skills**. How community planning and building design interact with policies, the natural and built environments, local economies, and human behaviors are a few concepts I aim to showcase in any future work projects and, eventually, in graduate school.

WORK EXPERIENCE

- ☐ **Pumpkin Shell School - Norman, OK** AUGUST 2024 - PRESENT
After-School Teacher
 - Maintain constant communication with parents and other teachers to implement specific needs
 - Create energetic and safe environment to encourage social skills and learning in the young students
- ☐ **Barnes & Noble - Norman, OK** SEPTEMBER 2023 - PRESENT
Part-Time Employee; Barista and Bookseller
 - Demonstrate a strong dedication to delivering products and services to customers with efficiency and polite mannerisms
 - Collaborate with managers to effectively train new hires
 - Maintain consistent coordination with management and other coworkers, and display creativity and critical thinking when challenged with obstacles or projects
- ☐ **Rusty's Custard Factory - Norman, OK** JANUARY 2022 - OCTOBER 2023
Shift Manager
 - Created a welcoming environment for customers through polite customer service skills
 - Quickly delivered products and maintained adaptable, professional communication with customers, coworkers, and management
 - Promoted an encouraging environment when training new employees

RESEARCH EXPERIENCE

- ☐ **Honors Research** FALL 2024
 - Completed independent research with guidance of an Environmental Design faculty member
 - Assessed Oklahoma City's first bus rapid transit system, the RAPID NW Line, to showcase resource connectivity for local populations
- ☐ **First Year Research Experience (FYRE)** SPRING 2022
 - Assisted an Astrophysics faculty member on their project and developed research, time management, and coordination skills
 - Analyzed large spectroscopy data sets from a white dwarf star, used Python code to graph, and interpreted the data for my final analysis and presentation
